# ROCKS: CAN BE MIND-BLOWING TO WATCH

**CASE STUDY/INSIGHT**

## **ROCKS: CAN BE MIND-BLOWING TO WATCH**

We all love to enjoy watching rivers and waterfalls flowing through different kinds of rocks and also love to climb on the rocks and dance. Don't they make the best match for nature? Rocks are beautiful creation of nature to admire at. Rocks are very common to find on earth and so the beauty of rocks is sometimes underrated. The most magnificent and monumental places in the world are made up of rocks. Rocks makeup the beautiful mountains and caves and are commonly found near rivers, beaches and other places. There are several vertical cliffs adjacent to sea. Rock cliffs are popular for rock climbing. Beauty of Himalayas and Ladakh are mesmerizing. Isn't it?

## **ROCKS: CAN BE MIND-BLOWING TO WATCH**

Rocks differ in their characteristics such as shape, size, texture, colour and composition. Every rock has its own uniqueness and beauty. It is common to find rocks on both sides of roads and railway tracks in many of the places during travelling. We might have enjoyed watching the rock sceneries with trees growing on them and animals like monkey jumping over them. While we talk about rocks, rivers are the most important thing.

Rocks constitute majestic ancient caves, which are of peak attraction for tourism. The beauty, their structures and the formation of such rock caves leave us awestruck. Some of the most stunning rock caves in the world are Hang Son Doong Cave, Mammoth Cave, Fingal's Cave, Skocjan Caves, Cave of the Crystals, Ajanta Caves, Ellora Caves, Batu Caves. In earlier kingdom periods, rock carvings and blocks have been used for temples, forts, bridges, etc. to demonstrate their arts and architecture.

There are spectacular rock formations in Forests also. Many of the rock formation are huge and viewing them is breath taking. We could find so many rock formations in rural areas which give pleasant feel to enjoy the scenery of rocks with the greenery.

## **ROCKS: CAN BE MIND-BLOWING TO WATCH**

There are many types of rocks that have been found by the human community. Igneous, sedimentary and metamorphic rocks are named after their formation and composition. Yet there are still many rocks that puzzle us with their unique formation and qualities. Rocks are so much fun and adventurous to watch. Climbing rocks and watching the place from peak of the rock is astonishing. Rocks depict the majestic beauty of our nature and watching them gives new feel to life. Just sight-seeing the beauty of rocks would give us pleasure and peace of mind, taking away stress and anxiety. Rock watching connects and establishes relationship with nature. Next time when you get opportunity to visit beautiful rocks, spend more time and enjoy it's beauty.
